

ISOLATE YOUR EYES

# COCOONS®

## COCOONS DELIVER RELIEF TO LIGHT SENSITIVE EYES!

Cocoons are specifically designed to be worn over prescription eyewear or as regular sunglasses, isolating the eyes from damaging UV light and harsh glare. The full wrap protection allows the eyes to relax and focus without the constant eyestrain caused by penetrating light.

Cocoons are especially effective for those who suffer from Glaucoma or Macular Degeneration. The patented designs and incorporated features make them the ideal choice for those with specialized sunwear needs.

- Scratch resistant, optically correct, polarized Polar lenses filter out 100% of damaging UV A&B light, while eliminating harsh glare. These lenses are extremely durable and are protected by a one year scratch resistance warranty.
- Unbreakable lightweight nylon frames are designed to provide maximum protection. Each style incorporates a brow bar, under scoop and side shields to deliver 40% more protection than conventional sunglasses.
- Adjustable Flex2Fit® temples can be manually formed for a precise fit that is extremely comfortable and secure.
- Available in six sizes with a choice of amber, gray, copper or yellow lens tints to meet a diverse range of light conditions and visual requirements.
- Every pair of Cocoons includes a protective neoprene case, large lens cloth and a limited lifetime warranty.

Cocoons are manufactured using the best in today's optical technology, providing the ultimate protection and prevention of sun damage to the eyes. For more information about Cocoons, see your eye care professional or call **Live Eyewear** at **800.834.2563** for an authorized dealer near you.
